Introduction

Podcasting has proven to be an engaging and powerful medium for storytelling and conversations, as well as news and entertainment. Listening continues to rise, as does the selection of content and the different ways we can listen to it. Triton Digital is introducing a half-year podcast report, providing insights into the evolving Canadian podcast landscape to accompany our monthly ranker reports at www.TritonRankers.com.

This report will cover trends in podcast listening from the content that is being listened to, when listeners are consuming to the average amount they are consuming. For participants in Triton's Canada Podcast Ranker, this report will also unveil the debuts, top podcast networks and top five most downloaded podcasts and podcast networks for the Top Overall, Top Canadian made English, and Top Canadian made French podcasts as seen in the first half of 2023.

The report incorporates data from multiple sources, including Triton Digital's IAB Tech Lab certified Podcast Metrics service, which measures server log data from Triton's Omny Studio platform and a variety of other industry hosting platforms.

As we enter the last few months of the year, we look forward to expanding upon these insights based on input and collaboration with all of you.

Who We Are

Triton Digital® is the global technology and services leader to the digital audio, podcast, and broadcast radio industries. Operating in more than 80 countries, Triton provides innovative technology that enables broadcasters, podcasters, and online music services to build their audience, maximize revenue, and streamline their day-to-day operations. In addition, Triton powers the global online audio industry with Webcast Metrics®, the leading streaming audio measurement service and Podcast Metrics, one of the first IAB certified podcast measurement services in the industry. For more information, visit www.TritonDigital.com.

Audience Measurement Product Suite

With 10+ years of audio measurement experience, Triton's Podcast Metrics and Webcast Metrics measurement service provides reliable and informative data around how, when, and where podcast, audio on demand, and digital audio content is being consumed across multiple hosting platforms. Metrics by date range, location, device, player, network, program, episode, and more. Our audience measurement suite includes:

Podcast Rankers: Each month, we produce Podcast and Streaming Rankers in various regions to report podcast and streaming consumption to the digital audio industry. Our Podcast Rankers list the top podcasts and podcast networks in Australia, Canada, Latin America, The Netherlands, New Zealand and the United States, as measured by Triton's Podcast Metrics measurement service. The entities listed are ranked by Downloads and/or Listeners/Users in accordance with the IAB Tech Lab's Podcast Technical Measurement Guidelines. View the rankings on www.TritonRankers.com.

Podcast Metrics: Analytics tool for measuring podcast consumption. Raw data from clients CDN (Content Delivery Network) logs are collected and processed in accordance with the IAB Podcast Technical Measurement Guidelines (certified compliant with version 2.1), to enable data around how, when and where podcast and on-demand audio content is being consumed to be reported across various hosting platforms. Podcast Metrics Demos+ is another tool in the measurement suite that delivers enhanced audience metrics for podcasts of all sizes in the U.S. enabled through the first-ever integration of census and survey-based research methodologies. Podcast Metrics also has the ability to ingest viewing data from YouTube and align that with podcast download data.

Webcast Metrics: Industry standard measurement service for online audio consumption data. Webcast Metrics provides credible data that enables audio publishers around the world to analyze the consumption of their content by daypart, device type, geography, distribution platform, and more.
