

TRITON DIGITAL'S STREAMING METRICS MONTHLY RANKER

Noviembre de 2025

Acerca de Streaming Metrics

El servicio de medición Streaming Metrics, de Triton, es el estándar de la industria para datos de consumo de audio en línea. Provee datos confiables y validados que permite a los publishers de audio de todo el mundo analizar el consumo de su contenido de audio por horario, tipo de dispositivo, ubicación geográfica, plataforma de distribución, y más.

Acerca de los rankers

Los Rankers de Triton son una lista de los principales publishers y redes de audio digital con mejor desempeño según lo medido por los servicios de medición Streaming Metrics de Triton.

Los Publishers están clasificados a nivel mundial y en tres regiones distintas: EE. UU., Latinoamérica y EMEA.

- El ranker global, medido por Streaming Metrics, verifica la cantidad de transmisiones sin calificar dónde se consumen.
 - Los rankers regionales cuantifican el consumo según la ubicación del oyente.
 - Todas las métricas dentro de los rankers de Triton incluyen tanto la escucha con o sin inserción de publicidad.
 - Las Sales Networks incluyen tanto los streams propios como los relacionados con las afiliaciones de la red.
-

Acerca de los rankings

Los rankings se computan por promedio de sesiones activas (AAS) y también se muestran las sesiones iniciadas (SS) y tiempo promedio de escucha (ATSL).

Explicación de las mediciones

Promedio de sesiones activas o AAS representa la cantidad promedio de sesiones en cualquier momento específico del período reportado sin incluir sesiones no válidas. El AAS se puede calcular dividiendo el total de horas de escucha (TLH) por la cantidad de horas dentro del período reportado ($AAS = TLH / \text{horas en el período}$).

Total de horas de escucha o THL se define como la cantidad total de horas que la estación/publisher ha transmitido durante sesiones con una duración de al menos un minuto dentro del período reportado. Se omiten todas las sesiones no válidas.

Sesiones iniciadas o SS se definen como la cantidad de sesiones con una duración mínima de un minuto que se iniciaron dentro del período reportado. Se omiten todas las sesiones no válidas.

Tiempo promedio de escucha o ATSL se define como la cantidad promedio de horas para cada sesión con una duración de al menos un minuto en total dentro del período reportado. Para calcularlo se divide el tiempo total de escucha por las sesiones activas.

The background is a solid blue color with various abstract patterns. There are several halftone (dot grid) patterns in different shades of blue, some of which form the outlines of continents like North and South America. Scattered throughout are various geometric shapes: circles of different sizes, some solid and some hollow, and thin vertical lines. The overall aesthetic is modern and digital.
